

LNG: SAFE FOR B.C.

A SPECIAL SERIES ON LIQUEFIED NATURAL GAS

LNG has been produced, transported and used safely around the world for decades.

Not under high pressure

(just cooled natural gas)

Returns to gas if released

(only a liquid if kept below -162°C)

Industry experience

(natural gas not new to B.C.)

Companies are careful

(safety of neighbours is paramount)

Government regulation

(companies are closely monitored)

Strong safety record

(one of the safest fuels)

LNG is one of the safest fuels to produce, store, transport and use. In B.C., the LNG industry will provide appropriate planning, prevention and risk mitigation in close coordination with local, provincial and federal authorities.

The BC LNG Alliance is the voice of British Columbia's new LNG export industry. Our mission is to foster the growth of a safe, environmentally responsible and globally competitive LNG industry in British Columbia and Canada.
