

SHIPPING LNG SAFELY

A SPECIAL SERIES ON LIQUEFIED NATURAL GAS

400+

LNG ships operating globally

LNG has one of the best shipping records of any industry

80,000

cargoes delivered since 1964

240-million+

kilometres travelled

ZERO

shipments lost through a breach or failure of the ship's cargo tanks

Transporting LNG by sea is safe because carriers are specially designed for LNG. Most have double hulls, are double insulated and LNG is stored in double-walled tanks. LNG has been shipped internationally for over 50 years without any significant incident resulting in a loss of cargo at sea or in port. It is safe to ship LNG in B.C. waters.

The BC LNG Alliance is the voice of British Columbia's new LNG export industry. Our mission is to foster the growth of a safe, environmentally responsible and globally competitive LNG industry in British Columbia and Canada.
